

## Installing *Chanccani Quipu*

- 1** Open the box and lay the cover flat on a table.
- 2** Notice the 5 knotted ends and gently lift them up and out together. Also notice how the Quipu unfolds in thirds.
- 3** Lay out the entire *Chanccani Quipu* flat as shown here.
- 4** Pull the dowel out from its cradle and locate the hanging strings.
- 5** Gently lift the Quipu out of the box.
- 6** Use the strings to hang your Quipu against a wall.
- 7** To pack the Quipu, you will work in reverse. Lay the Quipu back in the box and put the dowel in its original position. Take the bottom knotted ends as shown and fold toward the right so that the first fold is the width of the box.
- 8** Then gently lay the bottom third of the Quipu on top. Close the box and store in a cool, dry location.
